

November 4th - 8th, 2019 · Berlin - Germany

nanoGe
Fall
Meeting

NCFun19_Fundamental Processes in Semiconductor Nanocrystals

Symposium organizers:

Ivan Infante
Vrije Universiteit
Amsterdam

Jonathan Owen
Columbia
University

Topics:

- Perovskite Nanocrystals III-V and I-III-VI QDs
- Precursor Chemistry and Nucleation
- Theoretical characterization of surfaces/interfaces and optical properties
- Doping

Invited speakers:

Maryna Bodnarchuk EMPA - Swiss Federal Laboratories for Materials Science and Technology, CH

Brandi Cossairt Department of Chemistry, University of Washington, US

Raquel Galian University of València, SP

Daniel Gamelin University of Washington, US

Zeger Hens Ghent University, BE

Arjan Houtepen Delft University of Technology, NL

Sohee Jeong Sungkyunkwan University (SKKU), KR

Heather Kulik MIT, US

Liberato Manna Istituto Italiano di Tecnologia, IT

Nathan Neale National Renewable Energy Laboratory, US

Dmitri Talapin University of Chicago, US

Oleksandr Voznyy University of Toronto, CA
