

nanoGe Fall Meeting 20 Proposal for Symposium

nanoGe Fall Meeting (#NFM) is a yearly event organized by Fundació Scito, composed of multiple scientific symposia. Fundació Scito is a non-profit organization with the capacity to organize and manage conferences. nanoGe is the conference trade mark of Fundació Scito.

Here we invite the scientific community to present proposals for NFM20 (<https://www.nanoge.org/NFM20/home>) a multisymposia event that will be celebrated between 19 and 23 of October 2020 in Barcelona, Spain. The venue will be the Barcelona World Trade Conference Center.

For organizational reasons, Fundació Scito has established common rules for all the symposia. Please read these instructions carefully for preparing your proposal.

The symposia are conceived to form an exciting, interdisciplinary event that attracts key players of the respective fields as organizers, invited speakers and participants. As always, nanoGe very much takes diversity into account when putting conferences together: from gender to geographical diversity and senior researchers vs. young-and-upcoming ones that will raise fresh ideas to their field.

If you want to propose a symposium that was already celebrated in the past, please contact us in advance at fallmeeting20@nanoge.org. You can check previous symposia here (<https://www.nanoge.org/advanced-materials-2dimensions-quantum-dots-renewable-energy-conference>).

General information

Duration

Each symposium will take a maximum of 3 full days, with maximum 6 invited talks per day.

Dates

This NFM20 (<https://www.nanoge.org/NFM20/home>) will be celebrated between 19 and 23 of October 2020 in Barcelona, Spain. Venue will be the Barcelona World Trade Conference Center.

The exact dates for each symposium will be decided by Fundació Scito attending to the interest in the topic; this will be measured by the number of abstracts submitted and the success of past editions, as well as the final number of Invited Speakers confirmed. Fundació Scito will do its best to schedule each symposium in the most convenient dates and will take into consideration any comment or request from the organizers but will not get any separate compromise do to organizational reasons. It is possible to suggest coordination of symposia at the level of programming but organizers must note that each symposium must be treated separately.

Registration fees

Registration fee is determined by Fundació Scito and will be common to all symposia. An early bird discount will be offered until oral abstract submission deadline. All participants will be required to register through nanoGe website according to the fee available at the

moment of registration. Fees will not be modified unless major reasons due to unforeseen circumstances. Invited Speakers have a reduced fee for full attendance. Invitation to more than one symposium does not waive registration fee.

Funds and sponsors

Each symposium in #NFM receives an initial budget of 500 Euro that can be assigned to cover invited speakers travel expenses or to improve the quality of each symposium (not honorarium).

In case the Organizers promote directly the participation of industries and sponsors, the 50% of the raised funding will be added to the budget for the symposium. Other schemes of distribution of sponsor's income will not be considered.

Joint and Plenary sessions

If you are interested in organizing a joint session with another symposium, please contact us with a proposal for such a joint session, including reason for it and list of speakers collated from the two symposia. Note: In addition to scientific reasons, acceptance of a joint session will be subject to schedule and room availability.

nanoGe Fall Meeting aims at including Plenary sessions with speakers selected from the Invited Speakers list by the Scientific committee of the Conference. Suggestions for potential Plenary Speakers will be taken into account. Note: As for Invited Speakers, no registration waiver will be granted to Plenary Speakers.

Proposal information

Symposium title:

The title must reflect the symposium description

Description of topical focus:

Consideration for the description of the symposium :

Write the description of topical focus in paragraph form.

The description must have between 80 and 200 words length.

Make the program description well focused on scientifically. It must be addressed to the researchers who will be submitting proposals to this conference.

This text will be used for promotional purpose of the symposium and it is important to include all the relevant information.

You can check past editions for ideas if needed.

List of symposium topics:

- List from 3 to 10 topics to explain topical focus at a glance.
- Enter only one topic per line.
- XXX

List of invited speakers:

| # | Family name | First name | Institution | Country |
|---|-------------|------------|-------------|---------------|
| 1 | Family name | First name | Instituion | Åland Islands |
| 2 | Family name | First name | Instituion | Åland Islands |
| 3 | Family name | First name | Instituion | Åland Islands |
| 4 | Family name | First name | Instituion | Åland Islands |
| 5 | Family name | First name | Instituion | Åland Islands |
| 6 | Family name | First name | Instituion | Åland Islands |

List of symposium organizers:

| # | Family name | First name | Institution | Email |
|---|-----------------------|----------------------|-------------------------|---------------------|
| 1 | Organizer Family name | Organizer First name | Organizer's Institution | organizer@email.com |

Optional comments:

Include any relevant information that has to be considered before approval of the symposium.

Is this a new symposium, or it is the continuation of an established symposium?

Did you establish some contact with nanoGe or with previous symposium organizers?

Maximum length of the optional comments: 400 words
